

Comparison table of parts of work of refrigeration mechanic occupations

Work units	Refrigeration Mechanic, EstQF Level 3	Refrigeration Mechanic, EstQF Level 4	Refrigeration Site Manager, EstQF Level 5
1. Installation of refrigeration equipment and systems			
Installing utility lines	x	x	x
Connecting and installing refrigerant pipes	x	x	x
Installing factory-assembled equipment	X under the guidance	x	x
Installing equipment made from refrigeration components		x	x
2. Maintenance and operation of refrigeration equipment and systems			
Regulating equipment	x	x	x
Testing equipment		x	
Servicing equipment on a regular basis	x		
Servicing equipment		x	x
Detecting and repairing faults in equipment		x	x
Activating, regulating and adjusting equipment	x	x	x
3. Leakage testing of cooling systems by opening cooling circuit			
Testing cooling circuit		x	x
Conducting procedures after testing		x	x
4. Leakage testing of cooling systems without opening cooling circuit			
Testing cooling circuit	x	x	x
Conducting procedures after testing	x	x	x
5. Refrigerant collection			
Collecting refrigerant from cooling system	x	x	x
Conducting procedures after collection	x	x	x
6. Management			
Managing the performance of installation projects			x
Mentoring those being supervised		x	x

Organising work and performing quality control of work			x
